

Performance in Initiating and Delivering (PID) Clinical Research CDDFT Performance in Approving and Recruiting to Research

Quarter 1 2017/18

Since July 2012, providers of NHS services have been providing data on performance in initiating and delivering clinical research. Data for studies which have received NHS approval (called NHS Permission) in the previous 12 months is submitted quarterly to the National Institute for Health Research (NIHR).

Below is a summary of performance submitted by CDDFT in Quarter 1 (2017/18) for studies active at the end of July 2017. Providers are asked to publish details of the length of time taken to approve clinical trials from the point at which NHS Permission is applied for through to the recruitment of the first participant. This period is known as the initiation stage and the NIHR has assigned a benchmark target of 70 days. Providers also submit information on those Commercially Sponsored Trials, which have closed to recruitment in the year and whether the trial has achieved its anticipated total recruitment target. The period between recruitment of the first participant and reaching the total recruitment target is known as the delivery stage.

Each quarter, CDDFT will update this information with the most recent studies. The data is correct as of end of July 2017 For Further information on PID reporting, please visit the NIHR pages at: <http://www.nihr.ac.uk/policy-and-standards/Performancein-initiating-and-delivering-research.htm>
